## President's Message

**Mrs. Humera J. Khan**  
President,  
Oriental Education Society

“If knowledge emanates and wisdom delays, education loses its purpose”.

I strongly believe that education is a comprehensive progression that leads to the accomplishment of the full potential of the students. Our students of SCCT are groomed to think out of the box and engulf articulation, novelty, and teamwork.

Our challenge lies in utilizing the changing learning patterns with changes in the methods of instructions tied with technological advancements, to create an educational experience that will influence the all-round development of the students and uphold our commitment towards nation building.

I am proud to claim SCCT to a diverse, students-centered campus offering high quality education.

As rightly said by John Dewey, “Give the pupil something to do, not something to learn; And the doing is of such a nature as to Demand thinking; learning naturally results”.

Our College ventures into the emotional and spiritual evolution of our students by organizing enlightening

lectures and workshops pertaining to socio-cultural integrity of the society. Women Development Cell, Literary Society, Media Society, Commerce Association, Computer Society and Economics/ Business Forum are the various active cells in this direction. To enhance the overall personality of our students, extra- curricular activities like drama, music, debates, elocution, poetry, playing musical instruments are conducted on regular intervals, which also brings laurel to the college at the University, State and National level competitions.

We are making remarkable progress in transforming our college into a highly competitive institution in the city as we are enjoying an increased level of awareness about the college by the public. This helps us replace possible misperceptions with an essential reality we were good, we have been getting better and increasingly, we are among the best.

**Dr. Haider-E-Karrar**  
CEO,  
Oriental Education Society

Education enables a person to face new challenges, achieve progresses and lead a successful life. The institute undertook a series of reforming exercises to become what it has become today. We now welcome students to come forward to experience the difference. Keeping abreast of this contemporary world of cut throat competitions, we at Oriental Education Society, aim at creating an interdisciplinary and a holistic academic environment that enable students to gain knowledge without stress. Oriental Education Society has been working relentlessly towards providing the highest quality of professional education to students with the objective of equipping them for a global career. To make a great career is a dream for every student and they see their dream coming true in this educational Institute of excellence. We have been

succeeding in our relentless pursuit of excellence which can be witnessed in our remarkable growth from one institution to a group, giving us a large family of students, faculty members, support staff and industry heavyweights, all of whom we are honoured to be associated with.

In the present competitive global scenario, we provide

you a platform to fulfil your most-cherished dreams and hopes. Our focus on continuous development, emphasizing quality teaching and sense of belongingness of the qualified and experienced faculty has brought laurels to our credit.

I am sure, the student aspiring to seek admission in our prestigious institutions are bound to meet success.

I wish you all a bright and prosperous future.

In the dynamic landscape of higher education, colleges serve not only as centres for academic learning but also as hubs of intellectual exploration and innovation. One significant aspect that contributes to this multifaceted environment is the establishment of a Research Cell within the college framework. This indispensable entity catalyses fostering a culture of research, innovation, and critical thinking among students and faculty alike. A Research Cell embodies the institution's commitment to advancing knowledge and addressing contemporary challenges through scholarly inquiry. It serves as a platform where students and faculty engage in systematic investigation, experimentation, and analysis across various disciplines, thus enriching the academic landscape and contributing to the broader body of knowledge.
